

FORAGE EXPRESS INC.

Forage Express is a recently established company that is primarily active in mining exploration since it owns new and modern drilling equipment. The company enjoys the support of businesses that have made their mark in their respective fields, such as commercial air services provider, Héli Express.

Forage Express is managed by an experienced and competent staff that strives to provide its customers with impeccable service. Thanks to its financial and human resources as well as its reliable equipment, the company has seen rapid growth and is developing new business opportunities in the exploration sector with the help of a fleet of proven aircraft and experienced pilots.

SKYJET INC.

SKYJET specializes in the air charter industry. The company provides Québécois with charter services from all airports in Québec, particularly Québec City and Montréal. SKYJET's approach to doing business is to give every customer the very best in personalized service. This approach is based on a simple business philosophy: always try to do more for your customers. When you opt for a SKYJET charter over a regular flight, one of the major advantages is that you avoid long waits at the airport and get home sooner.

Our company offers a fleet of modern, well-maintained aircraft equipped with the latest technology. SKYJET operates a fleet of three comfortable and well-maintained aircraft.

HÉLI EXPRESS

Founded in 1989, Héli Express Inc. is a commercial air services provider whose name is recognized far beyond the Canadian borders.

Industries, governments and humanitarian-aid organizations use our services for various tasks, including mining, oil exploration, seismic and magnetometric readings, construction and inspection of power lines and pipelines, exploration, land surveying, monitoring and fighting of forest fires, ambulance transport, medical evacuations, photography, film production, and VIP transportation.

Héli Express provides helicopter services to grassroots mineral exploration programs in some of Canada's most remote areas. We fly exploration geologists, perform geophysical surveys, transport mineral samples, move drills and support field camps for the mining industry.

Created to fulfill the needs of governments as well as those of mining, forestry, oil, and hydroelectric companies, Héli Express performs a wide range of operations across the country, as far as Baffin Island. Our participation in the James Bay project and in the development of Hydro-Québec's transportation network remain our greatest achievements. We have included a list of the various organizations and ministries that have been using our services on a regular basis for years, as well as a description of the work we accomplished for them.

The vast territory we cover, the diversity of our experience, the skilfulness of our staff, and the versatility of our fleet and equipment give Héli Express the reputation we proudly bear.

Héli Express is a subsidiary of Groupe Autobus la Québécoise.
